

Windows 10 File Explorer

File Explorer allows you to browse, search, and manage files and folders on your PC, OneDrive, and external devices. Downloads, Documents, Pictures, Music, and Videos are examples of folders that are available in File Explorer.

There are two ways to open File Explorer:

1. Click on the taskbar icon. To bring up the taskbar, press the Windows logo key + E.

2. Access the Start menu, click on the File Explorer icon. See More.
